

LITERATURE SURVEY

S. No.	Title	Year	Author	Publication	Remarks
1	Probability and Statistics	2009	Michael J. Evans and Jeffrey S. Rosenthal	The Science of Uncertainty	This case study presents a focused analysis of the state/union territory-wise distribution of schools' water infrastructure and management practices during the academic year 2020-21 in India. Leveraging advanced statistical techniques and the R programming language, it aims to identify patterns and disparities in water accessibility, providing valuable insights for evidence-based decision-making and policy formulation.
