Abstract

India is a rapidly changing country in which inclusive, high-quality education is of utmost importance for its future prosperity. It is needless to mention that the higher secondary stage is a crucial stage of school education as after this stage students become eligible to compete for professional courses to be future engineers, technologists, doctors, teachers or for pursuing academic courses at the tertiary stage. Therefore the impact of covid 19 lockdown on high school students is crucial as they are at the peak of choosing a career for life . This case study analyses the effect of technological, lifestyle and mental changes happening among the high school students of few selected schools of several districts in Kerala as they are coping with the Pandemic without having to compromise their academics.
