

ANALYSIS OF GROWTH IN **PHARMACEUTICAL INDUSTRY IN INDIA** **DUE TO COVID19**

ABSTRACT :

The COVID19 pandemic had a great impact on various sector of industries , one of the major industries that showed sudden growth was the pharmaceutical industries. We try to analyse the rate of growth in pharmaceutical sector in India after covid19 in phases: from occurrence of COVID19 in India to Post Lockdown. Here our goal is to learn if the growth was linear or exponential growth, factors that contributed to the growth (demand, price, stock, shares, etc..) and a short comparison of growth at first phase versus last phase.
